ANNUAL REPORT

HFA by the Numbers

Healthy Families America (HFA) is one of the most widely implemented evidence-based home visiting models across the US and the signature family support program of Prevent Child Abuse America. By supporting parents in the home, HFA helps to build the foundation for healthy development; early, nurturing relationships between caregiver and child maximizes opportunities for children to reach their full potential. Following voluntary enrollment in HFA, families work one-on-one with a family support specialist and receive services tailored to their specific needs. Parents can enroll in the program starting prenatally or at birth, and receive support up until the child is five years old.

Chapter Network by the Numbers

At Prevent Child Abuse America (PCA America), we are able to extend our reach and impact through our extensive nationwide network, consisting of chapters in 47 states and Washington, DC, with plans underway to expand to all 50 states. PCA America chapters range from independent nonprofit organizations to entities operating under umbrella institutions such as government agencies, hospitals, and universities. Our chapters enable children and families to thrive through programs such as child sexual abuse and bullying prevention; home visiting and parent self-help education; and other family support services that give parents, caregivers, and communities the tools they need to establish strong foundations for healthy child development.
